A CLASSIFIED ADV. SAVED HIM

And now advertising has saved a man from the gallows! He was arrested in Chicago, and the police forged a chain of circumstantial evidence against him that seemed to seal his doom. His lawyers put an advertisement in the Chicago News, Jan. 2, appealing to unknown witnesses to come forward and supply the necessary evidence to break the hypothetical police chain. These witnesses were scattered here and there, being guests at the Y. M. C. A. on the night of the murder, when the accused man claimed to have also been a guest. The ad produced this scattered evidence, and the man was set free. Thus is the far-reaching power of classified newspaper advertising strikingly exemplified. We are just beginning to see what this form of advertising really is. When you want to attain a desired result or secure a needed thing, advertise! Even liberty comes when beckoned with printer's ink!
